Subject: Re: Good Grief!

Hi, Eric. I'm not 100 percent sure what triggered this, either. Paul called about an hour ago, then Lora Werner called and also sent me a summary of results put together by OSC DiDonato. Basically, Ann's summary is a list of Dimock homes that are not on an alternate water supply, but have contaminants in the well water. I'm guessing Dennis wants to know if he needs to take an action.

I just saw an e-mail pop-up from Dennis, so let me look at that and I'll get back to you. Thanks.

I understand you've been pulled into a data review tonight! I don't often talk with Ron and Paul on Friday evenings. Unfortunately, I don't know what it is that triggered all this, and neither does Karen. It was quiet in the office today and nothing was hot when I left. Thanks for helping out -- please copy me if you send something to Ron.
